

NuRAN Wireless Launches New Carrier-Grade GSM LiteCell 1.5 – An Industry Game Changer

Quebec, QC, Canada, February 18, 2016 - NuRAN Wireless Inc. (“NuRAN Wireless” or the “Company”) (CSE: NUR), a leading supplier of mobile and broadband wireless solutions to “connect the next billion”, is delighted to announce the launch of its fourth generation GSM basestation: the GSM LiteCell 1.5.

The GSM LiteCell 1.5 is characterized by the industry’s:

- Lowest satellite bandwidth consumption
- Lowest power consumption
- Lowest total cost of ownership (TCO)
- Smallest, lightest and easiest to deploy

The biggest improvement in the carrier grade GSM LiteCell 1.5 is the powerful processor that allows satellite bandwidth optimization. By reducing by almost a factor of 10 the bandwidth requirements without affecting the quality of the users’ experience, this solution enables the mobile network operators to expand their footprint and grow their subscribers base profitably. It can accomplish this by connecting areas with low average revenue per users (ARPU) and populations ranging between 500 and 20 000 people.

“The operators in low density, low income and remote villages used to face two major challenges that made them unable to bring connectivity to these areas in a profitable manner; namely power consumption and the satellite bandwidth. The GSM LiteCell 1.5 is a drastic game changer: it provides a mobile connection in a radius of up to 22 kilometers with less power consumption than a single light bulb as well as reducing the satellite bandwidth to a minimum by using NuRAN’s LiteSat bandwidth optimization features. All the tools needed are now available by Nuran to democratize the access to mobile communications in even the most challenging sites” explained Martin Bédard, co-President of NuRAN Wireless.

About NuRAN Wireless

NuRAN Wireless is a leading supplier of mobile and broadband wireless solutions. Its innovative GSM, LTE, and White Space radio access network (RAN) and backhaul products dramatically drop the total cost of ownership, thereby creating new opportunities for mobile network operators and internet service providers.

The company provides a variety of specialist systems for indoor coverage, rural and urban connectivity in emerging markets, connectivity to offshore platforms and ships, and for emergency and crisis communications.

Forward Looking Statements

This press release contains forward-looking statements. Often, but not always, forward-looking statements can be identified by the use of words such as “plans”, “expects” or “does not expect”, “is expected”, “estimates”, “intends”, “anticipates” or “does not anticipate”, or “believes”, or variations of such words and phrases or state that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of NuRAN Wireless to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Examples of such statements include: the Company’s quest to connect the next billion; statement that 2016 will prove to be another major turning point as the Company’s sales pipeline continues to grow substantively; statement that the Company’s products and solutions are being tested for future deployments in many countries on the five continents worldwide; the Company’s expectation to continue its revenue growth and reach its primary business objective of profitability by the end of 2016; statement that the Company will continue to deploy its current 2G products while concurrently working on its next generation product line to continue to fuel future demand for rural connectivity; statement that Nutaq Innovation will continue to pursue its long standing status of innovation with 4G and 5G development. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this press release. Such forward-looking statements are based on a number of assumptions which may prove to be incorrect, including, but not limited to: the ability of NurRAN Wireless to obtain necessary financing; general economic conditions in Canada and globally; competition for, among other things, capital and skilled personnel; our ability to hire and retain qualified employees and key management personnel; possibility that government policies or laws may change; possible disruptive effects of organizational or personnel changes; technological change, new products and standards; risks related to acquisitions and international expansion; reliance on large customers; reliance on a limited number of suppliers; risks related to the Company’s competition; and the Company’s failure to adequately protect its intellectual property; interruption or failure of information technology systems and other risk factors described in the Company’s reports filed on SEDAR (www.sedar.com), including its financial statements for the year ended October 31, 2015, and those referred to under the heading “Risk Factors”. These forward-looking statements should not be relied upon as representing NuRAN Wireless’ views as of any date subsequent to the date of this press release.
